## **Airworthiness Circular**

To,  
The QA Manager  
Budhha Air Pv. Ltd.  
Kathmandu, Nepal

Dear Sir,

With reference to the flight control (Aileron) pulley assembly bearing damage found in your ATR 42 aircraft bearing the Registration Mark 9N-AIM (MSN: 388), it is required that all of your ATR 42 series aircraft be inspected for the same reason within 15 days and submit the report on the inspection within the stipulate timeframe.

Sincerely Yours

Er. Samrat Pradhan  
Sr. Officer  
Airworthiness Inspection Division  
Flight Safety Standards Department
